

"ICF" MEANS YOU SEE SAVINGS

All things being equal, it is impossible to say that a home built with wood is a better value than an Insulated Concrete Form (ICF) home. **Sun Valley Enterprise** has long been a leader in ICF construction with a reputation for building true ENERGY STAR® homes and some of the most superior energy efficient homes in the Rio Grande Valley. Bring us your written construction bid from a wood-frame builder, and we will show you how our ICF construction will give you a better value--surpassing the performance of the home in energy savings, safety, strength, indoor air quality, and much more.

** Estimate must be presented on company letterhead and construction must be of similar quality.*

**Bring us your floor plans
for a FREE estimate.**

The Leading Builder of Insulated Concrete Form Construction in South Texas

- Greater energy efficiency and comfort
- 30% energy savings
- Improved noise reduction
- Fire and mold/mildew resistant
- Excellent indoor air quality
- Solid protection from hurricane winds & tornadoes
- Durability and low maintenance
- Flexibility for creative design & finishes
- Competitive pricing

This home received a HERS Index Score of "63" from Chris Carroll's Inspection Services, placing it in the top best-performing ENERGY STAR® homes in the Valley. The HERS Score of 63 means almost 40% savings in utilities.
